theories of justice are haunted by a paradox the more ambitious the theory of justice the less applicable and useful the model is to political practice yet the more politically realistic the theory the weaker its moral ambition rendering it unsound and equally useless brokering a resolution to this judgment paradox albena azmanova advances a critical consensus model of judgment that serves the normative ideals of a just society

without the help of ideal theory tracing the evolution of two major traditions in political philosophy critical theory and philosophical liberalism and the way they confront the judgment paradox azmanova critiques prevailing models of deliberative democracy and their preference for ideal theory over political applicability instead she replaces the reliance on normative models of democracy with an account of the dynamics of reasoned judgment produced in democratic practices of open dialogues combining hannah arendt s study of judgment with pierre bourdieu s social critique of power relations and incorporating elements of political epistemology from kant wittgenstein h l a hart max weber and american philosophical pragmatism azmanova centers her inquiry on the way participants in moral conflicts attribute meaning to their grievances of injustice she then demonstrates the emancipatory potential of the model of critical deliberative judgment she forges and its capacity to guide policy making this model s critical force yields from its capacity to disclose the common structural sources of injustice behind conflicting claims to justice moving beyond the conflict between universalist and pluralist positions azmanova grounds the question of what is justice in the empirical reality of who suffers in order to discern attainable possibilities for a less unjust world

this book is concerned with the conditions under which epistemic reasons provide justification for beliefs the author draws on metaethical theories of reasons and normativity and then applies his theory to various contemporary debates in epistemology in the first part of the book the author outlines what he calls the dispositional architecture of epistemic reasons the author offers and defends a dispositional account of how propositional and doxastic justification are related to one another he then argues that the dispositional view has the resources to provide an acceptable account of the notion of the basing relation in the second part of the book the author examines how his theory of epistemic reasons bears on the issues involving perceptual reasons he defends dogmatism about perceptual justification against conservatism and shows how his dispositional framework illuminates certain claims of dogmatism and its adherence to justification internalism finally the author applies his dispositional framework to epistemological topics including the structure of defeat self knowledge reasoning emotions and motivational internalism the dispositional architecture of epistemic reasons demonstrates the value of employing metaethical considerations for the justification of beliefs and propositions it will be of interest to scholars and advanced students working in epistemology and metaethics

when this work was first published in 1960 it immediately filled a void in kantian scholarship it was the first study entirely devoted to kant s critique of practical reason and by far the most substantial commentary on it ever written this landmark in western philosophical literature remains an indispensable aid to a complete understanding of kant s philosophy for students and scholars alike this critique is the only writing in which kant weaves his thoughts on practical reason into a unified argument lewis white beck offers a classic examination of this argument and expertly places it in the context of kant s philosophy and of the moral philosophy of the eighteenth century

contains text of sermons delivered by m j savage and others in new york city

nov issue includes proceedings of the annual meeting

if reason is so useful and reliable why didn t it evolve in other animals and why do humans produce so much thoroughly reasoned nonsense hugo mercier and dan sperber argue that reason is not geared to solitary use it evolved to help justify our beliefs to others evaluate their arguments and better exploit our uniquely rich social environment
